

KPA: Dealer Compliance Programs That Fit

“We’ve reduced our workers’ compensation claims by over 30% with the help of KPA.”

– Dave Trzesniewski, Service Director, Walnut Creek Honda, Walnut Creek, CA.

KPA’s safety and compliance consulting and loss control services are helping Walnut Creek Honda be more productive and driving results for the bottom line.

We’ve been using KPA for over ten years and they just do a fantastic job...year over year KPA services have a direct impact on our financials. KPA has helped us save thousands of dollars a year in workers’ compensation costs with their comprehensive safety program.

KPA takes all of the headaches out of our environmental concerns and safety programs. I find it difficult to keep up with changing regulations...it was very time consuming to manage all of the different compliance and safety issues.

KPA's expertise is unique and their staff of engineers is unparalleled. They continually coach us, provide ongoing training – and actually make it fun. Through KPA's compliance program and their safety meetings, they help keep your technicians safe.

All that leads to a better bottom line through increased productivity and better Customer Satisfaction. Happier customers are going to come back more often. KPA helps you do that.

By having KPA, you are saving yourself money. KPA helps you keep your employees safe, keeps them working, and keeps your workers' compensation rates down...and that's what it is all about.

The unfortunate part for most dealers that don't manage this well, or don't have someone to manage it for them, is that they deal with it when it is too late. With KPA you do not have to worry if an inspector walks in and says I want to look at your facility...you know that it is being managed on a regular basis.

We will only use KPA here in our facility. I would highly recommend KPA to any dealership or group because they are undoubtedly the industry best...you can't find a better provider for environmental, health and safety compliance and loss control/workers' compensation savings.
